

Green-line d.o.o. je preduzeće koje se bavi uvozom i distribucijom okova za nameštaj renomiranih svetskih proizvođača, osnovano 2000. godine. U okviru preduzeća posluju: maloprodaja u Jagodini i maloprodaja i veleprodaja sa sedištem u Nišu.

U našem prodajnom asortimanu nalazi se kompletan program vodećih svetskih brendova kao što su: FGV, Volpato, Poliplast, Davoline, Rodi, Telma, Eurokant, Arkopa, Mepa, Donau ... Zahvaljujući dugogodišnjoj saradnji sa ino-dobavljačima u prilici smo da Vam ponudimo širok asortiman robe po najpristupačnijim cenama, veliki lager, kvalitetnu uslugu i naravno transport robe.

Ono na čemu insistiramo je pre svega kvalitet proizvoda i trudićemo se da, zajedno sa Vama, narednih godina pratimo sve svetske trendove i unesemo kvalitet u Vaš dom.

Tržište je preplavljeno proizvodima različitih robnih marki, kvaliteta i cena, tako da pažljivo i stručno birajući kao za sebe, odabrali smo najbolje za Vas.

Zato je pred Vama „prvenac“ kataloga GreenLine, jako značajan za nas, a savremeno dizajniran, koncipiran i sistematizovan za Vas. Potrudili smo se da na najjednostavniji način predstavimo celokupan asortiman našeg preduzeća uz mnoštvo fotografija, šema i tehničkih detalja.

U očekivanju da ćete postati naš stalni partner, sa najboljim željama,

Šarke su i dalje najefikasniji način za manipulaciju vratima. FGV je vodeći proizvođač šarki u Evropi. Proizvodni program obuhvata opseg od sofisticiranih pa do najjednostavnijih modela šarki. Poslednje inovacije u smislu funkcionalnosti kao što su otvaranje vrata na dodir (push šarka), SlowMotion i damperi su upotpunili ponudu FGV-a.

Optima Click, M Slide-On, mini šarka pokrivaju potrebe i najzahtevnijih korisnika.

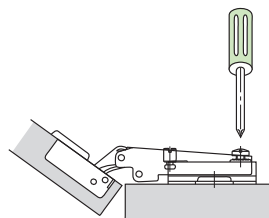

SERIJA M SLIDE-ON

Specijalni klizni Slide-On sistem koji se koristi za spajanje šarke i montažne pločice predstavlja glavnu karakteristiku ove šarke i omogućava brzu montažu i podešavanje.

NAČIN MONTAŽE

Stavite srednji deo šarke na prednju stranu montažne ploče i pustite šarku da klizne na montažnu ploču dok se ne zaustavi.

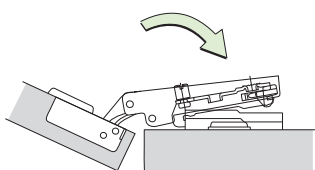

Pritegnite spojni šraf.

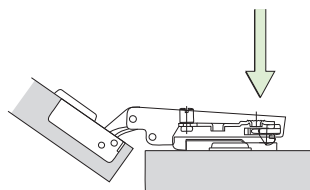

SERIJA QUICK

Šarke "QUICK" se lako pričvršćuju na osnovu, što je tipična osobina serije "QUICK". Šarke se mogu brzo i lako prilagoditi zahtevima, pogotovu kada se podešava otvaranje vrata ka spolja i to pomoću ekscentričnog šrafa koji se nalazi na vratnom krilu. Ova nova šarka oblikovana je vanredno moderno i detaljno je izrađena.

NAČIN MONTAŽE

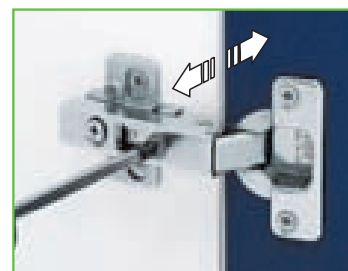

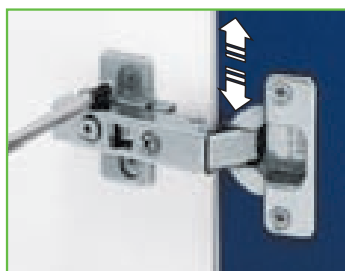

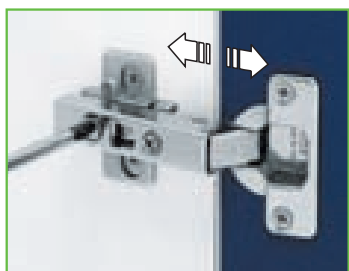

Stavite prednji deo šarke na prednju stranu montažne ploče i okrenite ručicu šarke.

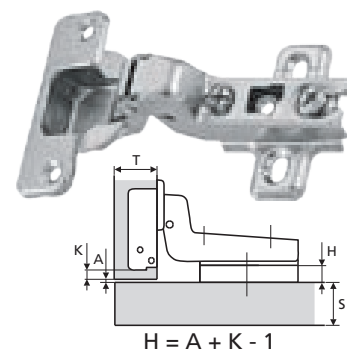

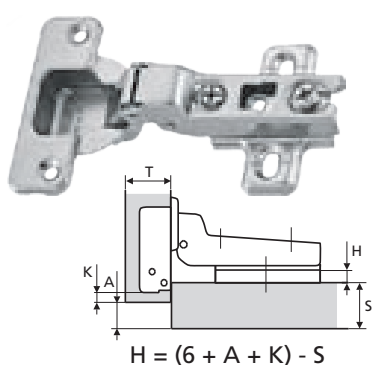

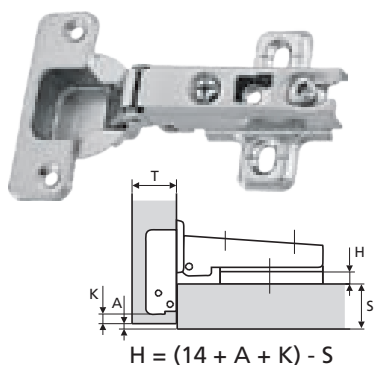

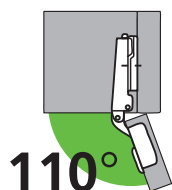

Pritisnite zadnji deo šarke prema dole tako da klikne.

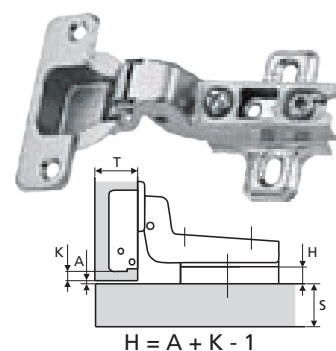

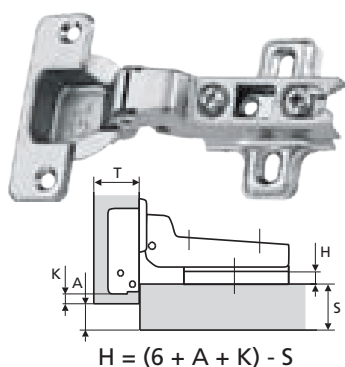

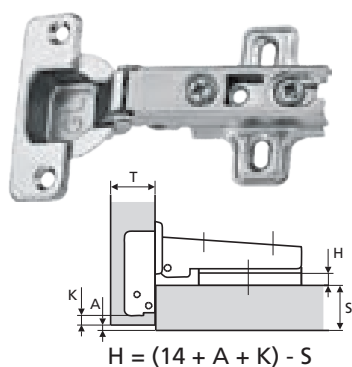

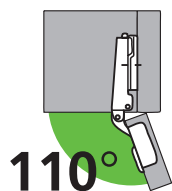

SERIJA OPTIMA

Optima quick šarke predstavljaju vrhunac ponude iz FGV proizvodnog programa. Optima klik šarke omogućavaju lako podešavanje vrata u optimalnu poziciju. Optima šarke su proizvedene po SlowMotion tehnologiji koja omogućava usporeno i bešumno zatvaranje.

Klizač fioke

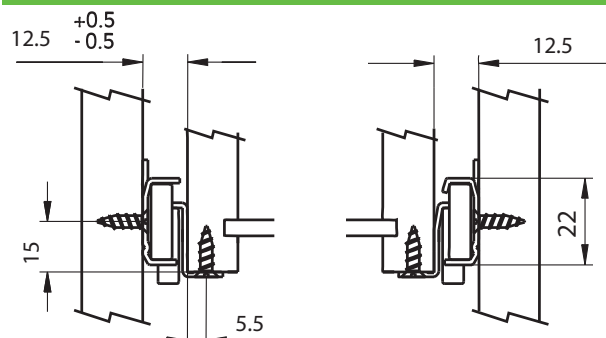

FGV
**FORMENTI &
GIOVENZANA**

Kompletna paleta kvalitetnih visokotehnoloških klizača za fioke prikazanih u ovom katalogu pokriva sve namene koje zahteva raznovrsno tržište. Namenjeni su održavanju bočne stabilnosti i glatkom funkcionisanju, a čak je i skraćivanje izvučenosti u znatnoj meri umanjeno da bi se omogućio maksimalni pristup sadržaju fioke. Neotrovan premaz nanet sprejom velike gustine garantuje izvanrednu glatkoću i nečujnost rada. Pritezanje klizača moguće je izvesti uz pomoć samovodećih šrafova, Euro šrafova i unapred montiranih PVC čepova prečnika 10 i 8mm. Klizači se iznova proveravaju i izlažu intenzivnim testovima od 80.000 otvaranja i zatvaranja, sa ležajem namenjenim za posebno velika opterećenja, kako dinamička tako i statička.

Metalne fioke

**FORMENTI &
GIOVENZANA**

Kada jednom isprobate metalne fioke firme Formenti & Giovenzana, više nećete tražiti dalje. Nečujne i otporne na opterećenja do 40kg, ove fioke se stalno iznova testiraju da bi se utvrdilo da li zadovoljavaju naše kriterijume. Neotrovan epoksidni premaz velike gustine garantuje izvanrednu glatkoću i nečujnost rada. Posebna pažnja pridaje se jednostavnosti i brzom montaži, a pritezanje je moguće izvesti uz pomoć samovodećih šrafova, Euro šrafova i unapred montiranih PVC čepova prečnika 8 i 10mm.

okov za plakare i ormane

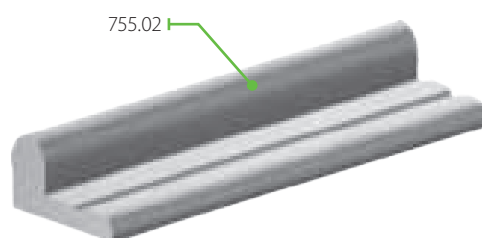

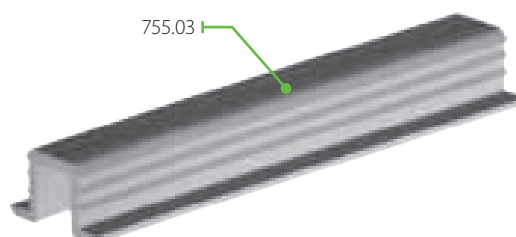

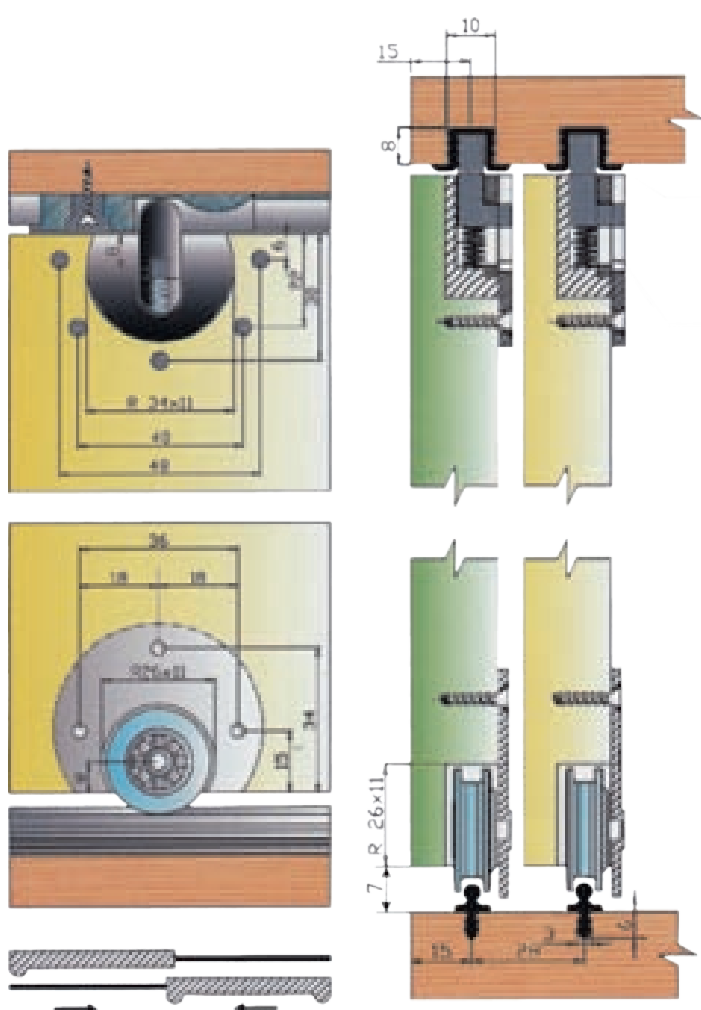

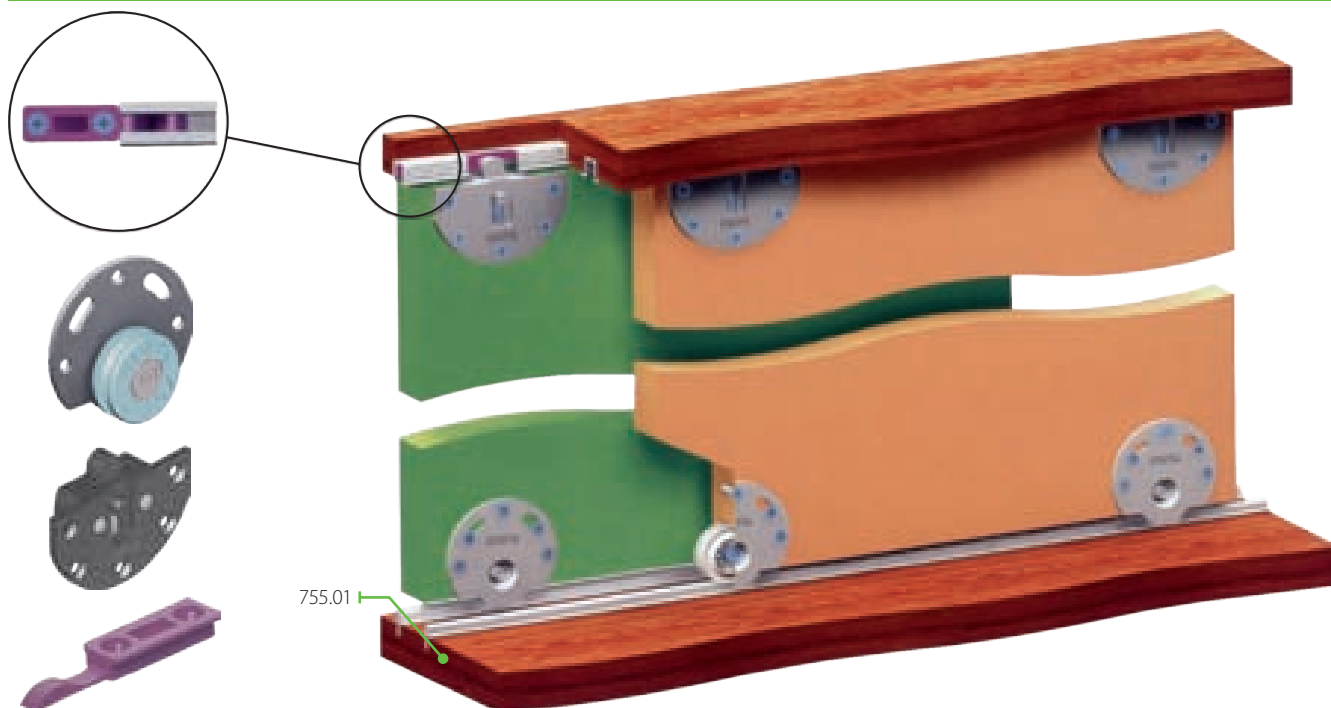

Technical drawing of a double-track railway track showing the layout of the rails and sleepers. The drawing includes dimensions for the track width (X), the distance between the rails (G), and the distance from the center of the track to the center of the sleepers (S). The formula $X = G + 5$ is provided.

FORMENTI &
GIOVENZANA

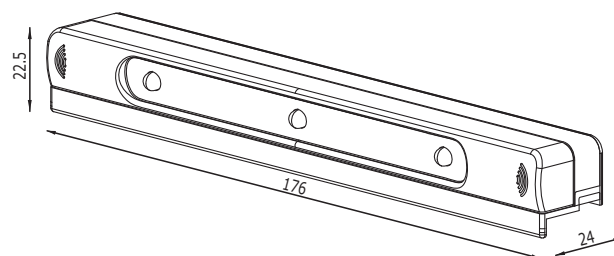

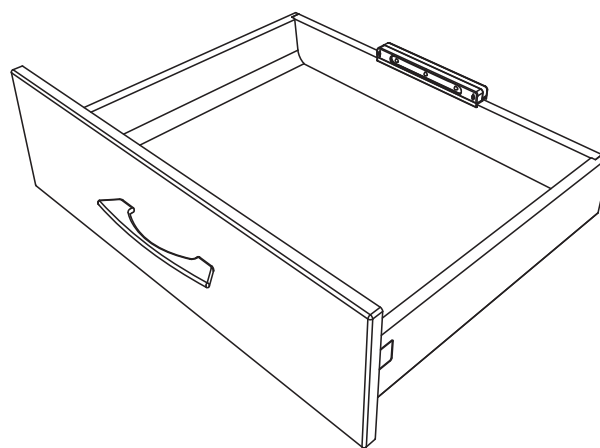

Mnoge prednosti:

- Automatsko aktiviranje na pokret uz pomoć patentiranih senzora i elektronskog čipa.
- LED najnovije generacije koji je postavljen i orijentisan da osvetljuje sadržaj vaših fioka.
- Niska potrošnja podešena na 20.000 otvaranja, 15 sekundi osvetljenja po jednoj grupi AAA baterija.
- Lak za postavljanje na zadnjem delu fioke napravljene od metala ili iverice.
- Jednostavan način menjanja baterija

Jednostavan za sastavljanje:

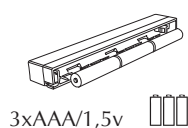

- Označite sredinu na zadnjem delu fioke.
- Sklonite osnovu lampice tako što ćete povući u stranu.
- Metalnu poledinu osnove pričvrstite iznad gornje ivice zadnjeg dela fioke koju ste prethodno označili.
- Na drvenoj površini koristite samolepljivu traku, namestite osnovu i pričvrstite po gornjoj ivici zadnjeg dela fioke.
- Proverite bezbednost baterija ili uklonite sigurnosnu papirnu traku i navucite kućište na bazu dok ne zauzme svoj položaj.

TELMA

Ogrebotine ... nisu problem
Specijalna formula stvara površinu otpornu na ogrebotine koju ne mogu oštetiti kuhinjska pomagala.

Vruće posuđe ... nije problem
Visoke temperature neće oštetiti ni omekšati čvrste površine Telma sudopera.

Udarci ... nisu problem
Materijal je prilično čvrst i može da izdrži i najjače udarce.

Čišćenje ... nije problem
I najupornije fleke je lako očistiti.

Higijena
Velika gustina materijala pomaže da se sudopera lako očisti i sprečava neprijatan miris sredstava za čišćenje.

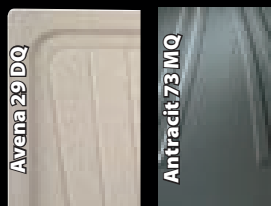

**ELEGANTNA, UMERENA,
INOVATIVNA**

ŠIRE I DUBLJE KORITO

Šta je Telma?

Telma je jedan od vodećih proizvođača kuhinjskih sudopera napravljenih od složenih materijala. Zapravo sama sudopera sadrži u sebi 80% prirodnog samlevenog granita i 20% akrilnih veziva tj. minimalne količine veštačkih materijala kako bi se spojila granitna masa. Kompanija Telma, iako mlada, uspela je da se probije i zauzme čvrsto mesto na velikom tržištu sudopera upravo zato što njeni proizvodi zadovoljavaju najviše standarde.

**Metal
quartz**

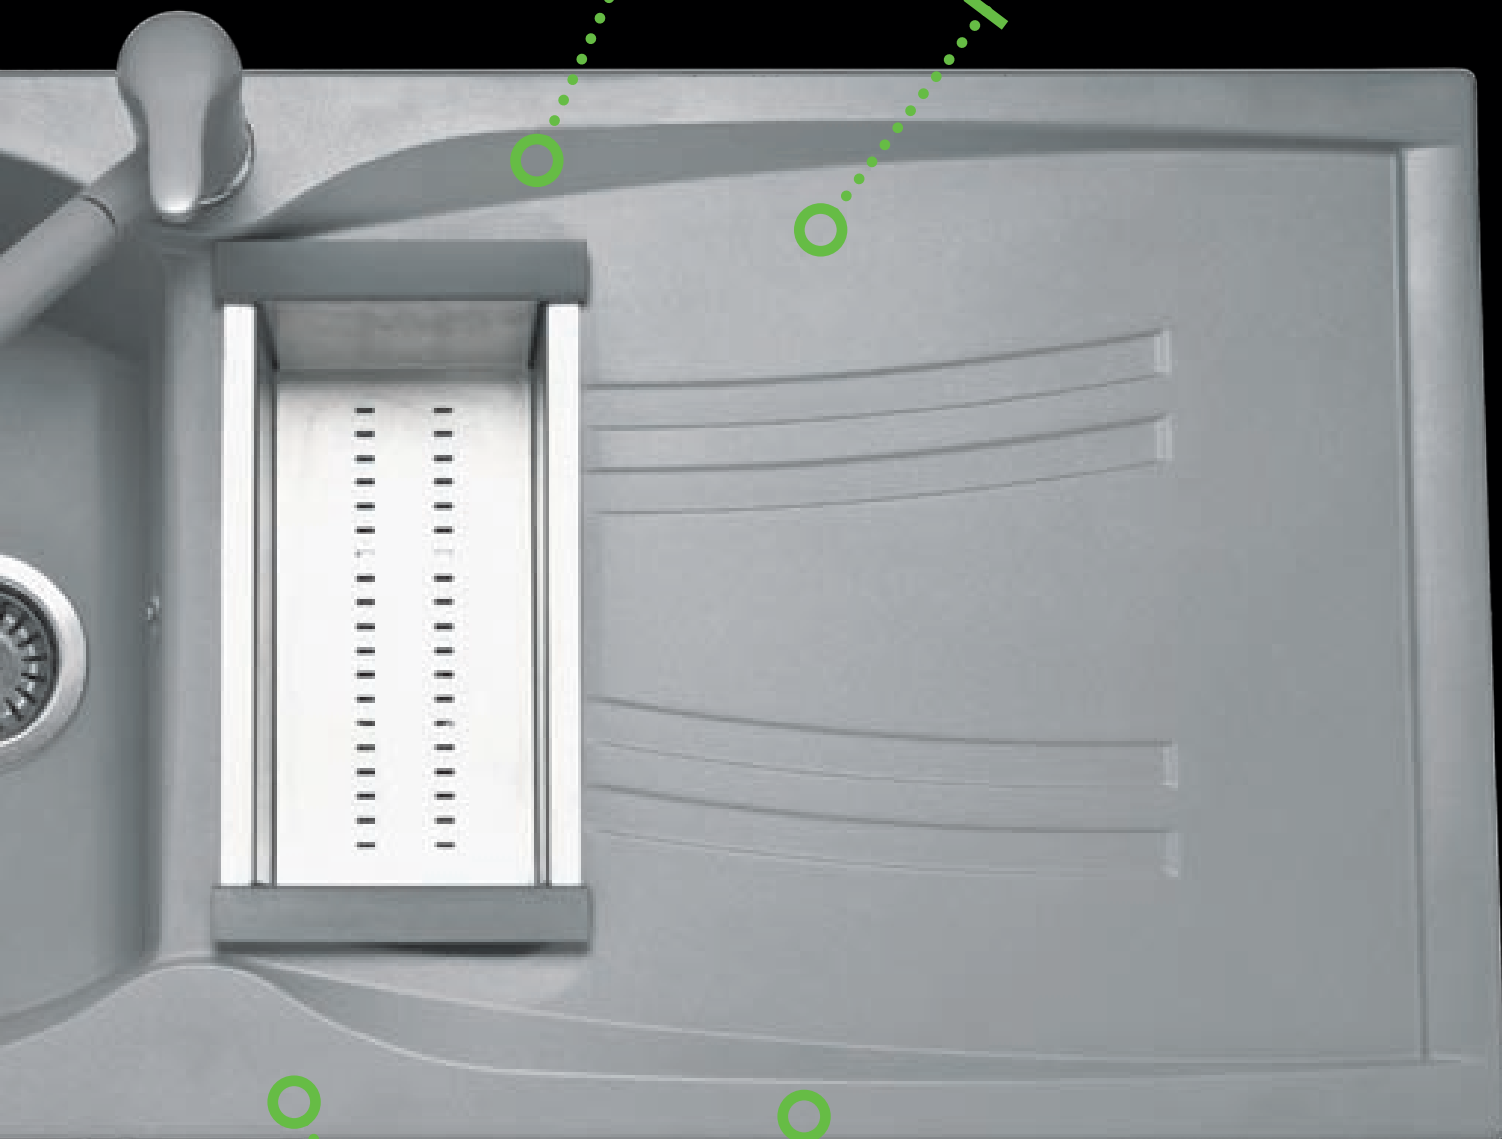

je novi oblik sudopera – metal-quartz sudopera se posebno ceni jer se po boji slaže sa sve većim brojem stvari koje se nalaze u modernoj kuhinji (nerđajući čelik, aluminijum, staklene komponente, ...)

**Dura
quartz**

ovo je poslednja epizoda u Telminom zanimljivom istraživanju kome nikad kraja. Mat površina, otporna na udarce, priroda se ne može poboljšati, ali se može imitirati. Dura Quartz vam pruža jedinstveni oblik sudopera.

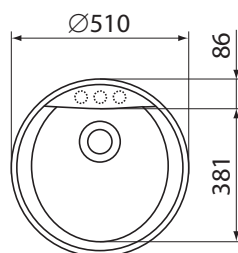

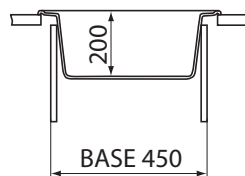

**JEDINSTVENI SLIVNICI ZAHVALJUJUĆI
OBLIKU KOJI SE NE MOŽE IMITIRATI**

Dispozer

TELMA

Telma dispozer treba biti instaliran na sudoperama isključivo sa otvorom 3 1/2". Inače lako se montira, lako se koristi i donosi mnoge prednosti korisniku, a samim tim i okolini. Svi znamo da nagomilano smeće može privući insekte, da ispušta neprijatne mirise (nehigijenski je) i zato korišćenjem ovog uređaja ostaci hrane (pileće kosti, ostaci voća i povrća, ...) su samleveni u fine čestice koje se ispuštaju direktno u kanalizaciju.

Telma dispozer je lak za korišćenje i praktičan uređaj jer eliminiše organske otpade na brz i efikasan način, održava našu kuhinju blistavo čistom.

Higijena

Svi ostaci hrane idu direktno u kanalizaciju i na taj način se sprečava pojava insekata, bakterija i neugodnih mirisa.

Čišćenje (održavanje)

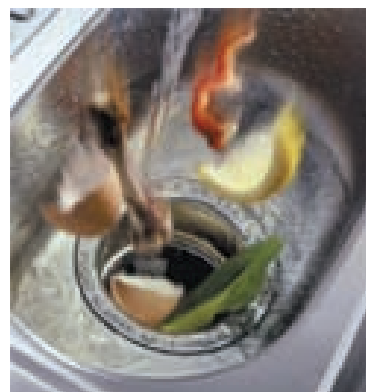

Jednostavnim otvaranjem vode i uključivanjem uređaja, čišćenje dispozera je praktično završeno, i samim tim nema ostataka hrane u samom uređaju (funkcija samočišćenja).

Funkcionalnost

Ovaj uređaj olakšava mnoge poslove vezane za pripremu hrane — daleko manja potreba za iznošenjem smeća, nema potrebe da se vrši dezinfekcija, nema neprijatnih mirisa, nema curenja tečnosti iz kesa za otpad)

Pozitivan uticaj na okolinu

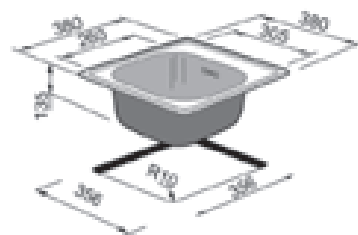

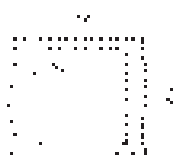

Svi ostaci hrane se sprovode direktno u kanalizaciju, zatim se te otpadne vode u specijalnim fabrikama prečišćavaju i na taj način se smanjuje zagađenje životne sredine.
